CUSTOMER REVIEW:

"This is the greatest saddle ever. Built by a trusted name. It is a little heavy, but not enough to outweigh the comfort. I would definitely buy this saddle again."

ErgoPro Saddle 17905

From fall arrest, to fall restraint, to work positioning, Buckingham's Ergo Pro tree saddle covers it all. This saddle is the latest edition in the Ergo line and was developed between Buckingham Manufacturing and certified arborist Ed Carpenter and his physical-therapist sibling Dr. Amanda Carpenter.

The Ergo Pro was designed to fit a range of climbing styles and motions and is one of our

lightest saddles available. The bridge is made of durable and strong kernmantle rope, is very easy to interchange, and the user can add additional bridges. In addition to two steal dee-rings, there are numerous rigid accessory loops located in various positions on the saddle, giving users endless options gear storage and customizability. Small accessory carabiners on the sides are perfect for your handsaw and there are strings on the back of the saddle for convenient storage

of a first aid kit. The back pad and leg pads have moisture-wicking Drilex material so the user remains, cool, dry, and comfortable.

The Ergo Pro meets ASTM F887 standard. Available in Small, Medium, Large, & X-Large. The Ergo Pro is available with a Buckingham harness (17905H4).
